DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ann I. Dennen, Reg. NO. 44,651, Tel: (256) 704-3900 Ext. 101 on April 27, 2005.

The application has been amended as follows:

Claim 5, line 5, "a location" change to - - a first location - -;

Claim 9, line 6, "the" (location) change to - - a - -;

Claim 9, line 6, "a" (power connection) change to - - the - -;

Claim 9, line 7, "a" (power contact) change to - - the - -;

Claim 10, line 4, "a location" change to - - a first location - -.

Allowable Subject Matter

2. Claims 1-20 are allowed.
3. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the references of the Prior Art of record fails to teach or suggest the combinations of the limitations as set for in the claim: a logic configured to analyze the data and determine a first location of the power contact and a second location of the power connection based on the data.

Regarding claims 2 and 20 are allowable for the reason given in the claim because of their dependency status from the claim 1.

Regarding claim 3, the references of the Prior Art of record fails to teach or suggest the combinations of the limitations as set for in the claim: a boundary box data defining a region that comprises a plurality of signal routes.

Regarding claim 4 are allowable for the reason given in the claim because of their dependency status from the claim 3.

Regarding claim 5, the references of the Prior Art of record fails to teach or suggest the combinations of the limitations as set for in the claim: logic configured to extract from the dataset a first value indicative of a first location of the design block and a second value indicative of a second location of one power contact and specifically comprising the logic configured to automatically design routing of power to the one power contact based upon the first value and the second value.

Regarding claims 6-7 are allowable for the reason given in the claim 5 because of their dependency status from the claim 5.

Regarding claim 8, the references of the Prior Art of record fails to teach or suggest the combinations of the limitations as set for in the claim: means for automatically routing power from the power connection to the power contact based upon the design block and boundary box defined.

Regarding 9, the reference of the Prior Art of record fails to teach or suggest the

combinations of the limitations as set for in the claim: a logic for analyzing the data to determine the location of the power connection and the power contact and specifically comprising the limitation of a logic for creating a representation of the power routing.

Regarding claim 10, the reference of the Prior Art of record fails to teach or suggest the combinations of the limitations as set for in the claim: a method comprising a step of extracting from a dataset comprising a plurality of values indicative of a design of an IC design block a first value indicative of a first location of the design block and a second value indicative of a second location of a power contact within the design block.

Regarding claims 11-12 are allowable for the reason given in the claim 10 because of their dependency status from the claim 10.

Regarding claim 13, the reference of the Prior Art of record fails to teach or suggest the combinations of the limitations as set for in the claim: a method of analyzing the data to determine the location of the power connection and the power contact and specifically comprising the method of creating a representation of the power routing.

Regarding claims 14-19 are allowable for the reason given in the claim 13 because of their dependency status from the claim 13.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
